Some Headlines

- School closures skyrocket, nearly 54 million students sent home
- Teachers Scramble to Make Remote Learning Work: 'It's Very Stressful'
- Coronavirus Throws Spring Testing into Disarray
- Trump Urges 'Schooling from Home' to Combat Coronavirus
- When will school reopen? No date in sight, and schools struggling to put learning online
- School closings create 'a thousand logistical' challenges to solve

What does this mean?

As more states and districts shut down in response to the outbreak of the novel coronavirus, the prospect that K-12 schools will be closed for weeks or months could severely test state laws that govern how many days public schools must be in session and when they must **stop** and **start**. And that scenario could leave major questions around how much education funding goes out to **schools hanging in the balance**.

A photograph of a young boy with dark hair, wearing a dark blue polo shirt, sitting at a desk and writing with a red pencil.
